The SoundDock Portable digital music system reproduces music with fullness and clarity unmatched by other battery-powered iPod speakers, from a design even slimmer than our original. Proprietary Bose technologies let you enjoy your iPod out loud in more locations—without compromising sound quality. A rechargeable lithium-ion battery included provides more power and longer playing time than most other rechargeable batteries. The rotating dock disappears for storage and protection during transit. And a molded handle makes it easy to carry the system from place to place. Just dock and play iPhone and iPod models featuring a click wheel, including all nano, mini, photo, and video models. The iPod charges as it plays for uninterrupted music enjoyment. A custom remote easily controls the system and basic iPod functions, including playlist navigation. Auxiliary input lets you play other portable sources, too. The SoundDock Portable digital music system. Unsurpassed performance and portability for the serious iPod listener—from the most respected name in sound. The SoundDock Portable system offers a combination of performance and playtime that other rechargeable systems can't match. Enjoy music from your iPod or iPhone almost anywhere. On the deck or in the dorm room, at the park or on the beach, it reproduces your favorite tunes with fullness and clarity unusual for a portable system. Enjoy your music out loud in more locations, without compromising sound quality. The SoundDock is ready to go anywhere with a slim design, a built-in carry handle, and a rotating iPod docking station—not to mention a rechargeable battery. Rechargeable lithium-ion battery offers hours of playing time between charges. You'll get about eight hours of playback at normal volume.

You can recharge the battery with any wall outlet or use an optional spare battery for a little extra time the unit batteries are easily user-swappable. Rotating iPod docking station spins shut when not in use, for protection during transit. Bose Quality Audio. Bose's proprietary acoustic design and powerful neodymium drivers provide more efficient and higher quality audio reproduction than many other battery-powered iPod speaker systems. In addition, Bose's digital signal processing circuitry enables finer control over the sound for more consistent, lifelike music reproduction even at low volume levels. Built-in carry handle. Your device will be ready to go when you are. Auxiliary Input. Thanks to the SoundDock's 3.5mm auxiliary input, you can play other audio sources, such as a portable DVD players, CD players, or other MP3 players. Remote Included. The handy remote gives you power and volume control, track seek, and iPod playlist navigation from almost anywhere in the room. Compatibility. The SoundDock Portable digital music system is Apple-certified and compatible with iPhone, iPod touch, iPod nano, iPod classic and any iPod featuring a click wheel. Product Details Product Dimensions 6.1 x 12.1 x 6.8 inches; 5.2 pounds Shipping Weight 8 pounds Rotating iPod dock spins shut for transit. The SoundDock 10 system delivers performance so powerful and lifelike, it could easily become your home's main music system. Its ideal for parties, gatherings, or your own personal listening. You've probably never heard your iPod sound this good. You'll experience a vast tonal range, from the deep lows of a bass line to the soaring highs of a vocalist. Its the result of advanced Bose waveguide speaker technology coupled with a highly efficient, one-of-a-kind new woofer. Plays other sound sources, too. Remote now also controls iPod playlist navigation.

It provides Bose quality sound for your iPod or iPhone wherever you like, plus system protection

during travel and more playing time when you arrive. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Cosmic Soujourner 4.0 out of 5 stars I dont purchase Bose products just because of the name, they do have products that are just not worth the money. Some of their earphones are just simply terrible. And some of their twopiece speaker systems with the Acoustimass module are not good. I ended up replacing those with floor standing speakers from other companies such as Polk Audio without the high premium cost that comes with Bose products. I have pretty much all the Bose iPod portable speaker systems including the original Bose SoundDock and SoundDock II. They were decent for their time but lacked an auxiliary port. For those of you wondering which Bose iPod player to go with, here is what you have been looking for. I wanted to give buyers an idea of what each has to offer and to try to clear the confusion. The Bose SoundDock Portable offers 1. Better sound than Soundlink. The bass on the SoundDock Portable simply is much better than the Soundlink. Why Because the SoundDock Portable has an actual bass reflex port while the Soundlink has a transducer in the rear that acts as a bass speaker. 2. Better mids and highs are offered by the SoundDock Portable. 3. Easily replaceable battery. The Soundlink does not have an easy access for the battery and requires more work. 4. Offers up to three hours of sound on one charge if played on loud settings. You can get more play time if you keep the volume lower. The Soundlink offers less play time but charges faster. The Bose Soundlink offers 1. Bluetooth capability.

But that comes with a cost. You see, the sound that comes through bluetooth is not as pure as a direct connection. 2. Small size. Because of its much smaller profile, it can be transported much more easily. Forget about transporting the SoundDock Portable with you on a trip. You will need to really think about packing this item as it is bulky and although you can close the iPod port, it is still a large device. 3. Integrated cover that folds close. 4. Charges faster than the SoundDock Portable which takes ten hours. The Soundlink charges up much faster. If you are looking for better sound, you should really go with the SoundDock Portable. It has a better roomfilling sound and if bass matters to you, this is definitely the way to go. The Soundlink does have bass but it cannot beat the SoundDock Portables bass reflex port. Both speaker systems have an auxiliary port for those who do not have iPods or iPads. I give the SoundDock Portable four stars as it is a decent speaker system. If you are looking for portability, then you would have to go with the Soundlink. You do give up some of the sound that the SoundDock Portable offers but you really cant carry that one around as it is too bulky. Further, you would need a case for it as it does not have an integrated cover. As you can see the photo of mine, it has scratches from having been carried around. You will bump it against things. Dont get me wrong but the SoundDock Portable is durable. It just gets scratched easily. My only gripe with this speaker system is that the top of the highs and the bottom of the lows are clipped and I find this same characteristic with other Bose speakers especially with the cube speaker systems. Its as if the sound has been compressed. Smaller speaker size do limit the sound that you can get from them. Theres no way around a full fledged home stereo system with full sized speakers.

But then you cant carry them around and take them to the beach or even the yard can youIt sounds loud and clear, and better than anything this size that I have come across. The speaker has traveled around the world with me and it has survived rainstorms and a banged up life inside my backpack. The only thing that broke down was the adaptor. It stopped working, but I was able to find a replacement online for cheap. The replacement was even better because it was smaller and was easier to travel with. I wish they continued to make this speaker. Already have one, bought this because its the same model which has been discontinued. I would like everyone to know that BOSE TAKES CARE OF THEIR CUSTOMERS. I had to send my old one in to Bose for repair when the pin connection got loose main problem with these Not only did they replace the swing out deck, but sent me back a new remote and back up charger; I honestly think they refurbished the whole thing. Not

only that, but they also sent me shipping labels and did not charge me a penny for any of this, for a practically new machine! I was telling my close friend that I have this portable Bose with bluetooth adapter. And it works on her iPhone 5 very well with the bluetooth adapter. She plans to take it on her boat this summer. She is very happy so thank you Amazon for having this cuz theres no other stores here that carry this particular model of Bose. I am a pretty big audiophile and generally, I am a pretty big audiophile and generally steer clear of BOSE products as i view them as overpriced junk for the most part. I bought this for a trip my best friend and i were taking to Ibiza and I wanted to be able to have some portable sound that could start a party on the beach or at the hotel pool. And that is exactly what this thing did. Even when it is just on battery power i filled an entire beach with great music and had people coming over and starting a dance party with us.

The remote control is simple and easy to use to the point where it does not matter how many banana daiquiris you have had. I would not recommend it for a full fledged house party, but it makes pretty impressive sound for a quiet beach, or hotel pool area, or just on a balcony to enjoy some music. The only gripe i have with this thing is i bought it, went to ibiza, then came back and the iPhone 5 came out literally while i was in ibiza. That pretty much has rendered this thing completely obsolete. I am sure BOSE has released some kind of adapter to help alleviate this, but im sure it will not come with the remote control functionality. And of course you can always still plug it into the AUX plug in the back of the sounddock. I believe BOSE also now has a bluetooth version of this, so to keep it future proof i would recommend just simply getting that. Ive been using it over 5 years now and although the battery doesnt last like it used to, it still works and sounds great. Only issue is the iPod dock connection disconnects if its bumped at all. A fenti kszuleknek halvany a kijelzese.

Eleg erdekesen van megoldva a kijelzo tapfeszze, sokban fugg a bejovo 12VAC feszultsegtol. Kerdesem az lenne, hogy a futest probaljam emelni, vagy a 24Vot. A D8on a 30V is kevesebb, de az AC 4.5V is. Melyik befolyasolja jobban a fenyerot. A futes, vagy a negativ tapfesz UdV Jacint Bose Sounddock 1 tapegyseg csati Sziasztok. Egy baratom megkert, hogy talaljak vagy gyartsak egy tapegyseget a Bose dokkolojahoz. Sajnos az eredetiket aranyarban adjak, igy gyartanom kell egyet. Talaltam is egy elegans kis 4 pines csatit, de fennakadtam az eredeti csatlakozo labkiosztasan. Talaltam egy rajzot de nem tudom eldönteni, hogy a kabeleket levot abrazolja, vagy a dokkoloban levot. Basszus vegfoka 23mp mulva megfut vagy pozitivba vagy negativba ha nincs a hangszoro rarakva, hangszoroval azonnal letilt, amikor a kimeneten eljut DC 4Vig a vedelem lekapcsolja relevel az erositot. Mikor a MUTE hibát kerestem, volt olyan eset is, hogy nem futott meg a kimenet es szolt a basszus rendesen, de ujboli bekapcsolaskor ha nem halkitottam le a potit akkor kikapcsolt a rele, ha lehalkitottam akkor jo lett, de nagyon susogott, arra hasonlitott mint amikor FM radio nincs az allomason, van egy kozos mute tranzisztor az kapcsolja az osszes tobbit, ha azt kszedtem akkor is megmaradt a susogas, szerintem visszafele jott valamelyik oldalrol ezert szedtem ki mindegyik oldalrol a tranzisztorokat, nem akartam bajlodni vele, hogy honnet jon a susogas vissza. Mi lehet a gond BOSE bekotesi rajz Legyszi legyszi ha valaki tudnasegiteni egy BOSE AMP2440as erosito bekoteseben, azt nagyon szepen megkoszonem. Ez AUDI A3asbol van, a steker nincs meg. The main differences between this model and the first edition is the remotes layout and color. Product features include rechargeable lithiumion battery, rotating docking system, remote, portable, built in carrying handle, and Bose quality speaker. You might not need every tool for every procedure.

With no major known failures or manufacturer recalls, the Portable v2 is noted to be a very reliable speaker. This device has a 30pin connection used for an iPhone 4s or older. The Portable v2 model has a rotating docking station. If you push on the edge of the docking port then it should rotate out. This device can run off of DC power from your home as well, so do not be alarmed and think this is not your model just because it has a power cord. Retrieved 20190613. With just a little practice and proper eye exercises and alterations, you can work out your eyesight problems and get your mind to work better for you in getting things done. You can determine to what extent your visual vision is deteriorating or not through performing a vision eye chart test. This is because people with visual

problems can not see clearly, theyre confused and cant focus on objects or they dont understand what theyre seeing. Do this over again until you feel comfortable that you know what it means. Whenever youre ready to learn more about the vision eye chart, talk with your doctor about it and discuss your vision. It is crucial that you be aware of the condition you have so you can determine the best treatment for your own problems. A physician will give you an eye test so you are able to ascertain your eyesight requirements and also help you to work together with your vision eye chart. The vision system is very complicated and different from one person to another. Our eyes perform various functions that react to light, colour and movement. The retinas are always changing and growing together with our mind as we age. This is why we must use eye exercises and mental visualization to be certain our eye health isnt being affected by another problem we may have. People who have a lack of focus can have many motives as to why they are having vision issues. Occasionally it is since their visual system is now damaged, sometimes its because theyve had a stroke or brain surgery, and sometimes it is a hereditary disorder. A visual system that is being used does not work for everyone.

A visual system that isnt working properly can become very bad and cause all sorts of issues for people that have vision problems. It is essential to work together with your eye doctor on this so that you can develop the best vision eye chart for your needs. You might even learn how to perform a vision eye chart for yourself. Dont allow your eye condition becoming worse and wind up with something serious. Discover how to restrain the eyesight problem and get on the ideal track to clear eyesight.
